## Directions for Ordering

**This List Conforms with 1923 Edition Standardized Plant Names**

Write plainly and give explicit directions as to address and mode of shipment. Shipments will be forwarded exactly as directed, but when without instructions, we will use our best judgment and forward by shortest and safest route. We recommend all herbaceous plants to be shipped by express.

All orders are accepted subject to previous sale and the following terms and conditions:

**PRICES.**—Prices in this catalog cancel all previous lists, catalogs and quotations. Prices are subject to change without notice. **Prices in this catalog include packing, except on special bulky pieces,** for which cost of packing will be extra. Our prices are f. o. b. our shipping station, or for local delivery f. o. b. customer's place if within 20 miles of our Nurseries. Arrangements can be made for distance deliveries by motor trucks of full truck loads if desired.

**STOCK SPECIALLY SELECTED** by customers at the Nurseries will be charged according to the value of the trees chosen, irrespective of catalog list price.

**QUANTITY.**—Lots of 5 and 50 will be furnished at the 10 and 100 rates respectively. Where no price per single plant is quoted lots of less than five plants of any one sort are sold at the 10 rate, plus 50%.

**TERMS, CASH WITH ORDER,** except to persons who satisfy us as to their responsibility, when **accounts will be due in 30 days.**

## Forwarding and Shipping

**SHIPPING SEASON** opens about March 1st in the Spring and August 1st in the Fall.

**INSPECTION.**—Our stock is regularly inspected and certificate will be sent with each shipment.

**GUARANTEE AND CLAIMS.**—All goods are guaranteed true to name, full count, up to grade, and in good condition when shipped. Our stock is of the highest grade, thrifty and well grown, insuring its success if properly cared for after transplanting. **WE CAN GIVE NO GUARANTEE ON THE LIFE OF STOCK,** as we have no control over its usage after it leaves our hands. **Claims** must be made within five days after receipt of goods. Stock delivered as per order and in good condition is not returnable.

**GOODS IN TRANSIT.**—All goods are at purchaser's risk after they are delivered to the forwarding companies and we receive their receipt for the shipment in good condition. **CLAIMS FOR DAMAGE WHILE IN TRANSIT MUST BE MADE TO THE DELIVERY COMPANY.** Have delivery agent note the damaged condition on the freight bill, promptly present your claim to the transportation company.

## An Invitation to Andorra

Those interested in trees and plants out-of-doors are always cordially welcome at Andorra. Excellent highways through this beautiful rolling section of Pennsylvania, with its charm of colonial manor house and country-place, offer inviting roads from every direction to visitors in motor cars. **TRAIN CONNECTIONS** over the Chestnut Hill branches of both the Pennsylvania and Reading Railroads make Andorra a two-hour run out of New York and a half hour from the heart of Philadelphia to Chestnut Hill Stations; from Chestnut Hill a ten-minute ride on the City Line car brings one to the Nurseries. **BY MOTOR** from Philadelphia, go out the Parkway; along the East River Drive, continuing up the Wissahickon and Lincoln Drives to McCallum Street, turn left and follow thru to dead end, turning right on Mermaid Lane and follow good road, turning left on St. Martins Lane; follow thru, turning right over bridge at Highland Station, continuing three blocks to Germantown Avenue. Turn left to City Line and then left one square to the Nursery.

## Planting New Places

Offers a problem both interesting and difficult to those not entirely familiar with Trees and Plants in their relation to each other and their future effect as specimens or in masses.

**The Andorra House Booklet.** Shows the development of the grounds—its illustrations carry one through the construction period to the finished place, showing in a marked way how much can be done with a small property, when carefully planned and planted. A copy will be sent on request.

## Deciduous Trees for Screens and Windbreaks

By properly planting trees of quick-growing varieties in combination with slower growing, more permanent sorts, it is easily possible in a few years' time effectively to blot out objectionable views which mar the outlook from house or lawn, at the same time by planting flowering trees, evergreens or shrubs on the lawn side, producing an added attractive landscape feature.

The trees found in this category comprise varieties which are valuable for the purpose, on account of their quick-growing qualities, as the Birches and Poplars, or for the charm of gorgeous fall coloring, as the Pin Oak. The admixture of long-lived trees and flowering sorts with this group is advisable. In any mass planting of trees the quickest and most satisfactory results are obtained when the spaces between the trees are planted with an undergrowth of spreading shrubs.

MAGNOLIAS—CHINESE SPECIES

Small trees flowering early, the blossoms magically appearing over night. Excellent for the garden or intimate planting near the house and seen to best advantage against a dark background of evergreens. Very fragrant. Any planting devoid of Magnolia bloom in early Spring loses much of the charm of our first bloom in the shrubbery or as specimens. Special attractiveness is added to garden entrances and pathways when these beautiful trees flank the entrance.

**Large Trees**

We are equipped to supply trees thirty to forty feet in height, that are in keeping in size and dignity with our spacious modern houses, these trees producing an immediate effect on estates which would otherwise be shadeless and uninteresting for many years. Prominent among the varieties of large trees which we have, and which can be successfully moved by truck or freight, are Maples, Elms, Oaks, Lindens, Planes and the spreading Beech; among the Evergreens are Pines, Spruces, the Japanese Cypress and great Boxwoods.

Oriental Plane Tree

**EUROPEAN PLANE TREE.**

We have made a specialty of growing the Oriental Plane, spaced wide apart in the nursery rows, insuring a fine symmetrically developed top, while frequent transplanting creates a thick fibrous root-system. Our trees are immeasurably superior to those grown without transplanting.

This rapid-growing, symmetrical, wide-spreading tree, is most suitable for city street planting. Attractive trunk and foliage, fine, symmetrical head. Not bothered by insect pests or smoky, dusty locations.

# The Oak

On account of its long life and freedom from injury by storms the Oak is generally looked upon as an extremely slow growing tree. To the contrary some varieties grow quite as fast as our other hard wood trees, notably the Pin and Red Oaks. Both these varieties are admirably adapted to street, avenue and lawn planting, where a handsome permanent tree is required.

## The Elm

Holding a distinctive place as a street tree or stately specimen the American Elm has become more widely known than some of the other varieties; these should share with the American species its popularity as they are adapted to a wide range of soils and possess the merit of being fairly rapid growers.

Hardy Flowers in the Garden

## Hardy Herbaceous Perennials

This List Conforms with 1923 Edition Standardized Plant Names

N. B. Quantities of 5 and 50 of a variety will be furnished at the 10 and 100 rates, respectively; quantities of less than five plants of one sort are sold at the ten-rate, plus 50%.

**T**HERE is a strong appeal in the gardens of old farmhouse and cottage with the glowing yellow and orange Day-lilies, bright flowered Phlox and Peonies, and their show of hardy Chrysanthemums; a demonstration of the ease with which these plants are grown and the little care they require when one thinks how little time the busy country housewife can spend in gardening. The old-fashioned perennials have been enriched with many improved varieties and species, and every corner of the grounds can be kept bright throughout the whole growing season; the tall growing varieties can be effectively planted in the shrubberies, their flowers showing against the background of evergreen or shrub, and the lower sorts blending the edge of shrubbery and lawn in naturalesque borders, or the wood edge made gay with some of the Asters, Foxgloves, Ferns and many others.

Of flowering plants, two things are demanded—Varieties which will brighten our lawns and gardens, and which can be cut for house decoration—these hardy herbaceous plants reward us bounteously in both requirements. The height, color and flowering season of each variety are given in the following list.

**HARDY CHRYSANTHEMUMS—POMPON VARIETIES**

When frost has browned the other flowers of the garden, these hardy plants burst forth in a profusion of bloom, in colors which seem to catch the most delicate tints and shades of bronzing leaf and gorgeous autumn sunset, while some foretell the purest white of coming snow, and pink of purpling shadows.

Planted in the hardy garden, border or lawn at edge of shrubbery, they will yield a wealth of bright flowers in late autumn, and fill the house with cut flowers.

Rich in Form and Color, the Peony is a Fine Cut Flower

### PÆONIA—PEONIES

Rich in an infinite variety of color, from white through tints of pink and rose to darkest crimson, these hardy plants grace garden, bed or border with gorgeous bloom in May or June, and their fragrant flowers are most decorative when cut for the house or porch. Whether against a background of evergreens or shrub border, or in the garden, they yield a rich return in blossoms. They are best transplanted in August or September, but may be moved in very early spring, and should be planted about two feet apart in good ordinary garden soil.

We are making some changes in our extensive plantations of peonies, and can offer strong plants from some of the best varieties, in assortment, for Fall planting, at exceptional values.

## INSECTICIDE DEPARTMENT

The frequent inspection and treatment of valuable trees, shrubs and ornamentals should not be omitted in these days when insects and blights are so prevalent. Provide your plants with good soil and plant food, but at the same time have a watch for borers, caterpillars, plant lice and other pests, which are easily remedied in the first stages of their progress by the timely application of sprays or dusts. For a convenient guide consult our list of insecticides. If the trouble is something new to you write us or send us a specimen. A proper remedy can be recommended in the majority of instances.

Unless otherwise noted, all prices F. O. B. Philadelphia.

All prices are subject to change without notice.

### SUNOCO SPRAY OIL

A heavy oil which readily gives a permanent and uniform emulsion when mixed with water. No heating, no odor, no tiresome procedure. For all scale insects, mealy bugs, wooly aphids, mix at strength of one part oil to twenty parts of water (1 qt. to 5 gallons). This also kills the eggs and prevents summer infestations of red spider, aphids and many other insects. January, February and March are favorable months for this treatment, but the late fall, just after the leaves drop, is just as good. Compared with lime sulphur solution, it is more efficient, unobjectionable to the skin, clothing, or paint on buildings and is easy on the machinery. It is also used as a summer spray and as a spreader for Bordeaux, lead arsenate or nicotine sulphate. Do not use with lime sulphur.

**CALCIUM CASEINATE (Red Diamond).** A powder. Not in itself an insecticide. Its peculiar properties cause a better adhesion and a uniform coating of the poison sprays to the foliage, fruit or bark, effecting an economy by giving better coverage and keeping the poison on the parts of the plant when it would otherwise be weathered off. 1½ lbs. are sufficient for 200 gallons (or one tablespoonful to 5 gallons) of spray material such as lead arsenate, lime sulphur, nicotine sulphate, etc. It is a vital ingredient of dry mixed sulphur and lime. Ask for *Red Diamond Brand*.

**BORDEAUX MIXTURE.** A powder. Fungicide. Absolutely essential on some crops to prevent blight and other diseases. Peach leaf curl, potato blight, black rot of grapes, bitter rot of apples, leaf spots of many shade trees and diseases of many vegetables, perennials, roses, etc., are properly treated by using this at strength of 3 to 6 lbs. in 50 gallons of water (1 to 2 ounces per gallon).

**PRICES:** 5 lbs. ....@ \$1.75  
50 lbs. ....@ 12.50

**BORDEAUX-LEAD ARSENATE combination.** A powder. The insecticidal and fungicidal properties of these two materials, as previously described, are brought together in this useful combination. Use 3 to 6 lbs. to 50 gallons of water.

**PRICE:** 5 lbs. ....@ \$1.75

**PARADICHLOROBENZENE (P. D. B.).** Small crystals. Apply these about base of trees for control of borers in peach and cherry (not apple). Use from  $\frac{1}{2}$  to 1 ounce per tree. It may be used with perfect safety on very young (2-year-old trees) if raked from about trunk at end of three weeks. Directions on cans.

**NICOTINE SULPHATE (40%).** A liquid. Aphids and all kinds of soft-bodied insects and some midges and some larvæ which do not come in this category are most effectively destroyed by this contact poison when used one part to 800 of water (1 or 2 teaspoonfuls per gallon). Makes a fine combination with Sunoco Spray Oil for control of box leaf miner and lace bugs. Roses, chrysanthemums, nasturtiums and other flowers should be sprayed with it regularly throughout the summer. Full directions on can.

**DUSTING SULPHUR (Niagara Sulfodust).** A superior sulphur for dusting only. Flows easily and evenly and contains a special sticker. Effective control for mildew, red spider and effective repellent against many pests.

**PRICES:** 100 lb. bags.....@ \$4.25

**NICOTINE DUST.** Quick control of aphids, slugs, thrip and many beetle larvæ is obtained by this material. It can be applied much more rapidly than the liquid nicotine sprays and is a great economy when many plants are to be covered. Perfectly harmless to the most tender foliage. Good coverage is obtained on under side of leaves. Lace bugs on Azaleas and Rhododendrons and box leaf miner adults are some of the difficult pests it controls.
